Practical guidance to clinical laboratories on pandemic response - IFCC evidence-based recommendations

Clinical Chemistry Webinar | July 22 at 4 PM GMT | 10 AM CET

Speaker

Associate Prof. Dr. PAVAI STHANESHWAR,
Department of Pathology, Faculty of Medicine,
University of Malaya, Kuala Lumpur, Malaysia

Biochemical monitoring of COVID-19 patients through in vitro diagnostic testing is critical for assessing disease severity and progression as well as monitoring therapeutic intervention. Several common in vitro diagnostic tests have been implicated in unfavorable COVID-19 progression, potentially providing important prognostic information.

This webinar highlights the International Federation of Clinical Chemistry and Laboratory Medicine (IFCC) guidance on:

- clinical indications for testing
- recommendations for test selection and interpretation
- considerations in test interpretation
- current limitations of biochemical monitoring of COVID-19 patients
